- Anti-Rust and Anti-Corrosion
- 100% Brand New and High Quality

MGL-TG003

Description

HIGH QUALITY MATERIAL: Our tie tools are made of stainless steel material for excellent durability. Our stainless steel ties are stronger and more durable than plastic ties, resistant to oxidation, heat and cold, high strength and easy to use.

EASY TO USE: You simply attach the tie with a tie and squeeze the handle to quickly secure the stainless steel tie. Once the stainless steel tie is tightened, pull up on the bar and it cuts easily with a clean cut and no sharp edges.

Ergonomic design: TPR material handle for comfortable and comfortable operation, excellent wear resistance and anti-slip

Easy to work with: Our tie kit set includes a durable tie wrench and stainless steel locking metal ties. Our tie-down kits save you time in selecting and using tie-downs. Our kits are less expensive than buying them individually. Choosing durable tools will save you time and money on post maintenance.

Wide range of applications: Stainless steel self-locking ties are perfect for universal applications in auto parts, home repair, computer repair and outdoor repair.
